FROM THE MEDITERRANEAN TO THE  
CANTABRIAN  
From the 1<sup>th</sup> October to 5<sup>th</sup> October 2021**

Organized by IPA Catalunya, the 4<sup>rd</sup> Transpirenaica IPA route is not a race nor a rally. It's a journey through the beautiful French and Spanish Pyrenees, alternating between the two countries during the entire route.

For those who enjoy riding the bike and long tour journeys, it's a hard path, full of winding roads and high mountains, featuring 14 of the best known ports (many of them are part of the Tour de France) and landscapes that can only be enjoyed when riding a bike in different ways.

This route combines planning, adventure and improvisation, making it a challenge.

The route will last four days, distributed as follows:

If the number of entries specified by the organization is exceeded, the rest will become part of the waiting list in strict order of registration until there is a vacancy.

The organization will have 4 bikes that will make the same tour, providing mechanical and medical assistance if it is needed by the participants.

The output of each stage will be of 1 minute intervals in order of arrival at the departure point in groups of at least 4 motorcycles.

This route does not have checkpoints, but has compulsory passage points that coincide with the mountain passes.

To obtain a certificate for the successful fulfilment of the route, participants must provide photographic proof of waypoints or crowned port.

The time taken to complete each stage is calculated based on an average of 50 km per hour.

The itinerary will be provided to all the participants by email one week before the event to prepare it in advance, to gather the necessary documentation (GPS, maps, etc.). A map around the Pyrenees is recommended, as the GPS may be unreliable in some points of the route.

The organization will provide the teams contact numbers to report incidents and abandonments.

In case of abandonment of the route, participants must provide their personal assistance to ensure their return to their home with the assistance provided by the insurance of each vehicle.

**RECOMMENDATION**

Due to the height, location and topography of these ports through which the route is developed, there is the option that one of them can be closed. Therefore, the detailed study of the possible alternative route is recommended. It is very easy and can save time if you have studied the ground.

**IMPORTANT**

You can display the full path and get a complete and detailed road book through Google Maps copying and pasting the required points and mountain pass by the same numerical order.
